MERIDIAN MACRO

The Macro Cheat Sheet

November 2026

Five pages. The numbers that matter this month, each with its official source and date, one chart and one line on what it means.

1 Inflation: US and euro area

2 Policy rates and 10Y yields

3 Real wages and household saving

4 Energy: Brent, EU gas and the curve

5 Release calendar, next 4 weeks

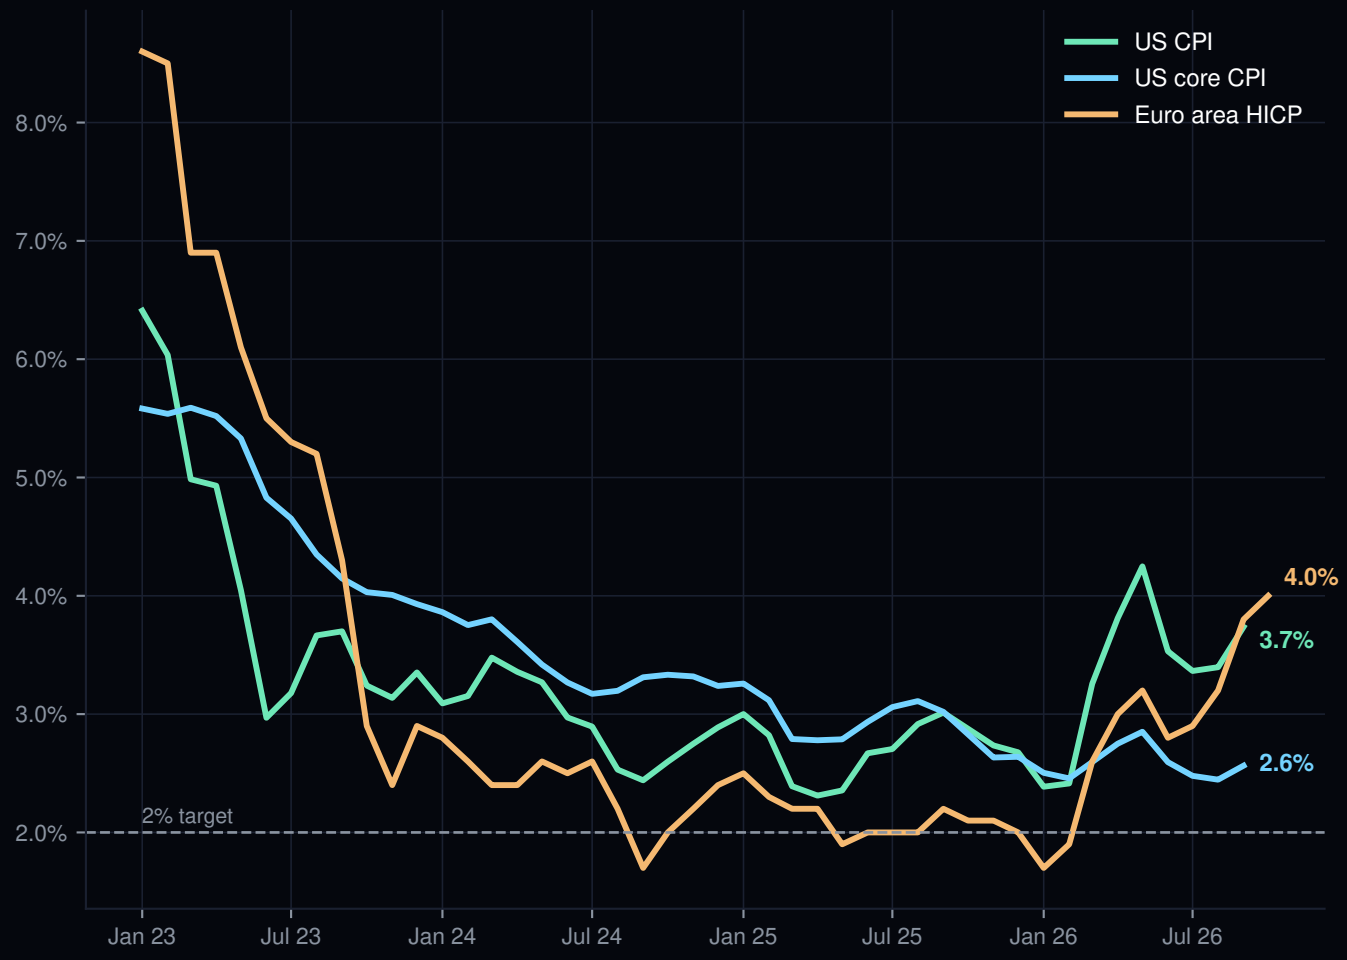

Data as of 09 Nov 2026. Built from FRED, BLS, BEA, Eurostat, ECB, Fed, EIA and ICE data.

Charl Van Zyl, financial data analyst | meridianmacroweekly.substack.com

Analysis only, not investment advice.

Inflation

Annual % change, monthly. US CPI, US core CPI and euro area HICP.

Source: BLS CPI-U NSA (CPIAUCNS, CPILFENS) via FRED, Eurostat HICP annual rates (prc_hicp_minr, EA). Latest Sep 2026. BLS published no Oct 2025 CPI, so that month is skipped.

LATEST NUMBERS

US CPI, annual	**3.7%**	BLS, Sep 2026
US core CPI, annual	**2.6%**	BLS, Sep 2026
Euro area HICP, annual	**4.0%**	Eurostat, Oct 2026
EA HICP, change in 3 months	**+1.1 pts**	Eurostat, Oct 2026

WHAT IT MEANS

Euro area headline has pulled above the US print, and US core near 2.6% still leaves little room for another oil leg.

Policy rates and 10Y yields

% level. Policy rates as steps, 10Y government bond yields.

Source: Fed (DFEDTARU), ECB (ECBDFR), US Treasury (DGS10), OECD (IRLTLT01DEM156N) via FRED. Latest 05 Nov 2026.

LATEST NUMBERS

Fed funds target, upper	**4.00%**	Fed, 08 Nov 2026
ECB deposit rate	**2.50%**	ECB, 06 Nov 2026
US 10Y Treasury	**4.84%**	Treasury, 05 Nov 2026
US 10Y, change in 1 year	**+0.67 pts**	Treasury, 05 Nov 2026
German 10Y, monthly avg	**3.47%**	OECD, Sep 2026

WHAT IT MEANS

The Fed funds upper bound sits at 4.00% after the autumn hikes, and a US 10Y near 4.8% keeps loans costly.

Real wages and household saving

US. Real hourly pay growth (bars) and personal saving rate (line).

Source: BLS (AHETPI, CPIAUCNS), BEA (PSAVERT) via FRED. Latest wages Sep 2026, saving Sep 2026.
No Oct 2025 bar, BLS published no CPI for that month.

LATEST NUMBERS

Nominal hourly pay, annual	**3.3%**	BLS, Oct 2026
Real hourly pay, annual	**-0.3%**	BLS calc, Sep 2026
Personal saving rate	**3.8%**	BEA, Sep 2026
Saving rate a year earlier	**5.1%**	BEA, Sep 2025

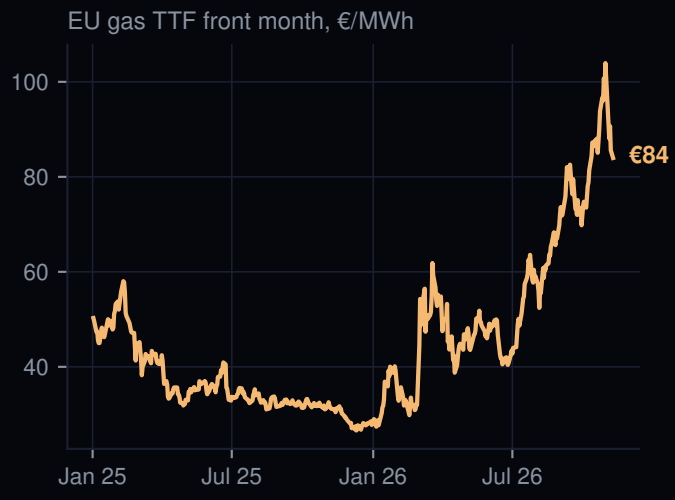

WHAT IT MEANS

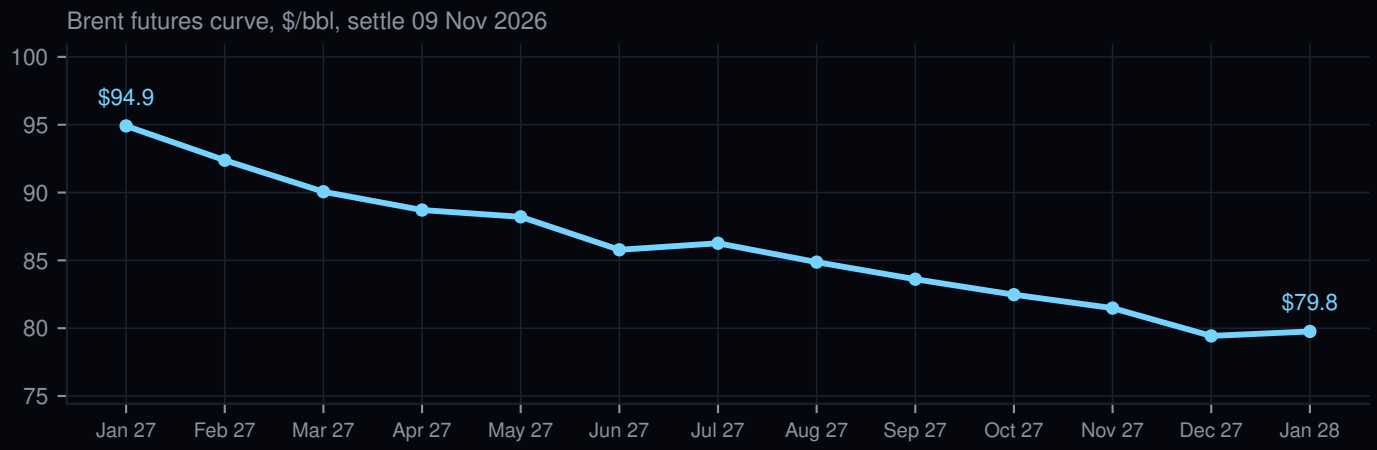

US real pay is still slightly negative versus CPI, and the saving rate near 3.8% leaves little buffer.

Energy: Brent, EU gas and the curve

Daily front-month prices, plus the Brent futures curve.

Source: EIA Brent spot (DCOILBRENTEU) via FRED, ICE Brent and ICE Endex TTF futures via Yahoo Finance.

LATEST NUMBERS

Brent spot	**$107.03**	EIA, 03 Nov 2026
Brent spot, change in 1 year	**+63%**	EIA, 03 Nov 2026
EU gas TTF front month	**€83.97**	ICE Endex, 09 Nov 2026
Brent Jan 27 less Jan 28	**$15.15**	ICE, 09 Nov 2026

WHAT IT MEANS

Brent futures near USD 95 stay well above last year, and a steep backwardation still prices relief by late 2027.

Release calendar, next 4 weeks

Scheduled US and euro area releases. Times CET. Click a release for the official page.

DATE		RELEASE (official page)	ADD
Tue 10 Nov	14:30	US CPI and Real Earnings, Oct BLS www.bls.gov/cpi/	Add
